

THE GREAT MILK BOTTLE INVASION

Lakeside Saturday 9th of August, What a day it was !!!! Arriving at the Lakeside track [not to ride our motor bikes] but to be greeted with the sight of 27,000 5 litre plastic bottles stacked 3 high and 3 deep on pallets in a line that seemed to go on for ever. OH MY GOD !!!!!!! The task involved putting the lids on a mere 27,000 plastic bottles and cramming them into large 1.3 x 1 x 1 metre hessian bags...

Never under estimate the power of the QEMSC members and their friends, they certainly came out of the woodwork to help, talk about people power.... The caps were going on at a frantic pace and several different methods were used to load them into the crash bags, the big fella's seemed to get this job being the only ones who could reach that high...

Hot and cold drinks were on hand, followed by a very welcomed BBQ lunch expertly organized by Milto.

Rex, Dave & Gene were cracking the whip making sure no one was allowed to slacken off, even taking photos in case you had your hands in your pockets...

The pallets were being emptied and disappearing fast, and so the end looked to be possible by early afternoon....

Rex proceeded to scare every one by saying 'another truck would be arriving shortly' Everyone hoped he was joking !!!!

QEMSC members and your friends, give yourselves a pat on the back for a job well done in super quick time, actually make that a brilliant job well done !!!!!!!!

A big thanks to everyone who turned up to help especially the many ladies..and the first class organisation...

Graham Barker
